OBJECTIVE

Passionate about applying machine learning, deep learning, and data science techniques to solve real-world problems and seeking opportunities to contribute to innovative research and development projects while continuously expanding my technical knowledge and practical experience in artificial intelligence and software engineering.

EXPERIENCE

Datasoft Manufacturing & Assembly Inc. (DMA) | February 2026 - Present

Software Engineer - Intern

Currently contributing to the development and maintenance of scalable enterprise software solutions within a collaborative team environment. I focus on crafting sophisticated backend logic and optimizing project development by integrating artificial intelligence, computer vision, and Django alongside standard backend frameworks. Furthermore, I actively participate in rigorous debugging and problem-solving to ensure the optimum performance, security, and responsiveness of all applications.

EDUCATION

B.Sc. in Computer Science and Engineering | *Expected Graduation: 2026*

3.78/4

American International University-Bangladesh (AIUB)

TECHNICAL SKILLS

Languages: C, C++, Java, C#, Python, R, Go

Web Stack: ASP.NET Core, ASP.NET MVC, HTML, CSS, JavaScript, PHP

Software Development: OOP, DSA, Data pre-processing, Data Analysis, Game Development

Data Science: Pandas, NumPy, Scikit-learn, TensorFlow

Architecture & Design: Enterprise-Level Applications, REST APIs, OOP, MVC Architecture, 3-Tier Architecture

Database: SQL, MySQL, SQL Server

Tools: Git, GitHub, Visual Studio, VS Code

PROJECT

- **Multi-class Brain Tumor Classification** | *Oct 2025* [Source](#)
Developed a fusion deep learning model combining MobileNetV2 and EfficientNetB0 for MRI-based brain tumor classification. Implemented transfer learning and fine-tuning to enhance model performance and adaptability, with Grad-CAM visualization for interpretability and tumor region analysis.
Technologies Used: *Python, TensorFlow, Scikit-learn, Keras, NumPy, Matplotlib, Kaggle*
- **AIUB Offered Courses** | *Jul 2024 – Jun 2025* [Source](#)
Designed and implemented a C# Windows-based system for managing offered courses at AIUB. The application automates course selection, validation, and record management with a structured and user-friendly interface.
Technologies Used: *C#, .NET Framework*

- Al Jazeera News Analysis | Mar 2025 – Apr 2025** [Source](#)
 Conducted large-scale text analysis of Al Jazeera articles using automated web scraping across multiple news categories. Performed data preprocessing tasks such as cleaning, tokenization, and lemmatization, followed by Latent Dirichlet Allocation (LDA) for topic modeling and visualization through bar plots and word clouds.
Technologies Used: *R, rvest, SnowballC, textstem, ggplot2, wordcloud, Git*
- Green Tea and Coffee Shop (E-Commerce Website) | Dec 2024 – Jan 2025** [Source](#)
 Developed a fully functional e-commerce website with a modern and responsive interface for tea and coffee products. Implemented an admin dashboard for product management and integrated a MySQL database for secure, efficient data handling.
Technologies Used: *HTML5, CSS3, JavaScript, PHP, MySQL, Git*
- SkyQuest (2D Arcade Game) | Jan 2025** [Source](#)
 Created a visually interactive 2D arcade game featuring aircraft navigation, item collection, and dynamic gameplay. Enhanced player engagement through immersive sound effects, animations, and high-score tracking with file-based storage.
Technologies Used: *C++, OpenGL, GLUT Library*
- Blood Donor Management System | Jul 2024** [Source](#)
 Engineered a .NET Framework desktop application for managing donor registration and search functionalities, featuring email and SMS verification to ensure data authenticity.
Technologies Used: *C#, .NET Framework, SQL Server*
- VOVO | Jul 2024** [Source](#)
 Engineered a .NET Framework desktop application for managing donor registration and search functionalities, featuring email and SMS verification to ensure data authenticity.
Technologies Used: *C#, .NET Framework, SQL Server*
- Prestige Motor Sales | Nov 2022** [Source](#)
 Created a Java-based desktop application for car inventory management and secure purchasing. Implemented search filters, user authentication, and transaction tracking for streamlined sales operations.
Technologies Used: *Java, File System, AWT, Swing*

CO-CURRICULAR ACTIVITIES

- General Secretary, Motijheel Model Debating Club | Jul 2019–Jul 2021**
 Led the debating club by organizing inter-school and intra-school debate competitions, managing team activities, and mentoring members in public speaking and argumentation skills.
Skills Gained: *Leadership, Public Speaking, Event Management, Critical Thinking*
- Organizing Secretary, Ideal College Debating Club (ICDC) | Feb 2022–Mar 2023**
 Coordinated college-level debate events, workshops, and training sessions for new members. Assisted in logistics, scheduling, and ensuring the smooth execution of competitions.
Skills Gained: *Organization, Team Coordination, Communication, Strategic Planning*

CERTIFICATIONS

- Introduction to SQL | Simplilearn | Mar 2025** [Source](#)
 Completed a foundational course covering SQL basics, including querying databases, data retrieval, and basic database management techniques.
Skills Gained: *SQL Queries, Database Management, Data Retrieval, Problem-Solving*
- Introduction to Artificial Intelligence | Simplilearn | Nov 2024** [Source](#)
 Completed a foundational course covering artificial intelligence principles, machine learning concepts, real-world AI applications, and basic neural network implementation.
Skills Gained: *AI Fundamentals, Machine Learning Concepts, Problem-Solving, Python Programming*
